

SortableObject

```
classDiagram
    class SortableObject
    class Event
    class ChangeLineUpEvent
    Event --|> SortableObject
    ChangeLineUpEvent --|> Event
```

A UML class diagram illustrating inheritance. At the top is the class 'SortableObject'. Below it is the class 'Event', with an upward-pointing arrow indicating that 'Event' inherits from 'SortableObject'. At the bottom is the class 'ChangeLineUpEvent', with an upward-pointing arrow indicating that 'ChangeLineUpEvent' inherits from 'Event'.

Event

ChangeLineUpEvent
